## Conditions of Sales

All contracts, sales, and acknowledgments of orders are contingent upon crop failure, our ability to import and make deliveries in conformity with the "Plant Quarantine Act," partial deliveries by growers or manufacturers, strikes, or other unavoidable causes beyond our control, clerical errors included; also unsatisfactory credit standing. All quotations are subject to market changes and goods being unsold on receipt of order.

## Forwarding Service

We pay postage on all orders for Flower Seeds provided the order calls for packets, ounces, quarter pounds. If other items are wanted by mail, remit postage according to the zone in which you reside. All postage is charged on dealers' orders regardless of items ordered.

On Seeds, Bulbs, Plants or Roots not exceeding eight (8) ounces in weight, the postage charge is 1c for each two (2) ounces or fraction thereof; sundries or other merchandise not exceeding eight (8) ounces in weight, the postage charge is 1½c for each two (2) ounces or fraction thereof. Seeds, Bulbs, Plants, Roots, Sundries, etc., weighing over eight (8) ounces, are sent at zone rates.

If remittance accompanies order, a sufficient amount should be included to cover the extra charge—if ordered to be sent by either of the methods as stated above.

No C.O.D. shipments of other material for less than \$1.00. This ruling due to the shortage of help and curtailed production. ### IMPORTANT NOTICE REGARDING FLOWER SEEDS

### PLEASE READ

Many varieties of flower seeds will not be available this season. The war has made it impossible to import stocks which are normally sold by the American seedsmen. Many of these sorts have never been produced in this country. Furthermore, the labor shortage has handicapped the production in California. We, therefore, will take the liberty of substituting other good varieties wherever possible. However, we believe that American florists will find that our list contains sufficient good standard varieties to cover their needs. A further suggestion is to order early while present supplies last.

## Michell's Superb Asters

We wish to emphasize the fact that our Asters are grown for us by specialists, and nearly all varieties under our own supervision. **Michell's "Distinctive" Quality** is nowhere more prominent than with our Asters.

**SPECIAL NOTE.**—In growing Asters, old soil and flats should never be used the second time without thoroughly sterilizing, to avoid the numerous diseases to which Asters are so susceptible. Barnyard manure should never be employed as a fertilizer. We recommend the use of finely ground bonemeal. Asters should not be grown in the same location two years in succession.

### Fusarium-Wilt Resistant Strains

These we believe to be practically immune to this disease. We feel sure that by using this seed many disappointments due to crop failures will be eliminated.

Splendid strain producing an average of 60 to 70 per cent doubles.

**NOTE.** It is important not to discard the small seedlings, as these usually produce the best double flowers.

**NOTICE.** Double Petunias are a highly bred type, and the seed is not as vigorous in growth as that of single strains. Seed of all our Double Petunias has been carefully tested in soil, October, 1944, and the germination has been found to average 70 to 80 per cent. For this reason, and because of its high cost, we cannot entertain claims on non-germination of this seed, or requests for replacements. If carefully handled we know the seed will grow.

Primula malacoides

## Michell's Primulas

### NEW GIANT MALACOIDES

We offer this magnificent new strain of *Primula malacoides* which has recently been discovered. The strong, robust-growing plants make excellent pot-plants, with extremely large, well-formed, rounded flowers produced in abundance on heavy, wiry stems rising from rich green foliage. Well-grown mature plants will have anywhere from 30 to 50 spikes.

**NEW DOUBLE TWINKLES.** Exquisitely dainty in coloring, Twinkles is a very soft flesh-pink, each petal accented with a picotee penciled edging of rich rose. Exceptionally free blooming, the hundreds of 3/4 to 1-inch florets nod gaily on their long, upright-growing, wiry stems. This strain comes 90 to 95 per cent double from seed. Original trade pkt. \$1.50

**NEW SWEETHEART.** Sweetheart adds a distinct bicolor to the group. The blooms are a bright salmon-pink bordered with a wide band of white softly flushed flesh-pink. In the center is a tiny but distinct touch of golden yellow. The individual florets are 1 inch in diameter, produced in many whorls on the long, heavy, wiry stems. Original trade pkt. \$1.50

**DOUBLE FAIRY JEWELS.** This superb new double sort has literally hundreds of florets 3/4 to 1 inch in diameter, of a lovely rich rose-pink color, slightly deeper in the center. The strain comes 90 to 95 per cent double from seed. Original trade pkt. \$1.50

**ENCHANTRESS.** Outstanding single variety of a beautiful soft salmon-rose color. Flowers are 7/8 to 1 inch in diameter and produced in unbelievable profusion. Original trade pkt. \$1.50

**SNOWFLAKE.** Pure glistening white, beautifully formed 1-inch florets adorn the stately stems like gleaming jewels. Original trade pkt. \$1.00

**LAVENDER GLORY.** This variety has the largest flowers of the group, being from 1 to 1 1/4 inches in diameter. They are soft mauve-lavender in color, beautifully formed, and abundantly produced. Original trade pkt. \$1.00

**MIXTURE.** The Mixture contains all of the above single varieties, together with a good many others still in the developmental stage. The Mixture is well worth growing for the many previously unknown shades and colors found in it. Original trade pkt. \$1.00

### NEW GIANT OBCONICAS

**NEW WYASTON WONDER.** This new type of *Primula obconica*, Wyaston Wonder, produces flowers of truly immense size. It is by far the largest-flowered variety in existence. The general growth of the plant is exceptionally vigorous and the huge heads of bright crimson flowers are carried on strong stems well above the foliage. We believe this to be the finest of the new Primulas.

Our connections with the most reliable producers in this country and abroad place us in a position of advantage for our supplies, chiefly because of the large volume of Grass Seed for which we contract.

We are always pleased to submit samples, with prices, for comparison and let our customers be the judges.

An excellent flowering bulb for the garden, known as the "Tiger or Shell Flower." Colors vary from pure white to gold and vivid scarlet—all deeply blotched and speckled with crimson-maroon. Plant in May, 6 inches apart and 3 to 6 inches deep. They require treatment similar to gladiolus.

## Montbretias, Giant-flowering Varieties

Montbretias resemble miniature gladiolus, are fine for cutting, and excellent for border planting. They prefer a light, loamy soil, well enriched with leaf-mould, but no manure or chemical fertilizer should touch the roots; a little bonemeal and a light top-dressing of lime should prove beneficial. They will thrive either in partial shade or full sunlight, but see that the moisture supply is good at all times.

## MICHELL'S SPECIAL BRAND LILY BULBS

### Suggestions in Connection with the Growing of Hardy Lilies Under Glass

Hardy Lilies should be grown cool and given 16 to 18 weeks from time of planting to bring them into bloom, so the best results can be obtained; in fact, if you can give them longer to come into flower it is better. Where they are forced with plenty of heat, the result is that you get good foliage with not so many early blooms.

## Miscellaneous Hardy Lilies

The hardy native Lilies are always an attraction and can at times be utilized in various ways, by reason of their oddity.

### Michell's Offering of New Patterns of Metalline

These five new patterns are of the latest design and entirely different, as well as popular priced.

#### Pattern 1950. Width 150

A three-striped Metalline of fine weave, the stripes being satin finish and the spaces between of a dull rayon which makes the design outstanding. The finish is of good texture permitting the ribbon to be made into a very nice bow that will hold its shape. We recommend this pattern for cheaper work, especially designs for your popular-priced funeral work. Price, \$1.60; 12-piece lots, \$1.50 per piece.

#### Pattern 1941. Width 150

An exceptionally heavy quality of woven material very suitable for the better grade of funeral work. Each edge has over 1 inch of taffeta weave, and the wide center is of a pebble-weave effect with ample space for lettering. This item is manufactured purposely for good work and makes a very beautiful bow that will stand out. It is not waterproof but has proved water-repellent and can sustain the elements, which would make it suitable for door-crapes as well as funeral work. We highly recommend this pattern as it makes a much nicer bow than satin ribbons.

Price, \$3.00; 12-piece lots, \$2.75 per piece.

These patterns are put up 40 yards to a piece and are made in the following colors:

White	Orchid	Yellow	Ophelia
Pink	Blue	Better Times	Fuchsia
Lavender	Nile Green	Picardy	Gold

These patterns are all different from those we have listed in past years, and we suggest you send us orders for some of each of these items. They are of the latest design and manufactured from the best rayon obtainable. As prices are subject to change without notice, it is important that you grasp this opportunity to supply your wants for the fall season without delay.

## VITA-GRO PLANT BANDS

Vita-Gro Plant Bands are made of heavy waterproof paper scientifically treated with nutrients to stimulate rapid, healthy plant growth. They retain moisture and thereby reduce frequency of watering about 50 per cent. They virtually eliminate all need of chemical feeding and are very economically priced. There are three types:

**Vita-Gro A.** Designed for all-round use, especially for long growing periods. Ideal for carnations. Treated with nutrients to assure well-balanced, vigorous growth. A heavy, sturdy Plant Band.

**Vita-Gro B.** Designed for growing periods up to eight to ten weeks. Same superior growing results as Vita-Gro A Plant Bands, but designed and priced for shorter growing periods.

**Growtex.** Has the same quick set-up and fast handling features without nutrient treatment. A low-priced Band giving satisfactory results for growing periods up to eight to ten weeks. May require occasional liquid feeding.
